Some jurisdictions have adopted policies that require large employers to provide employees with at least two weeks' advance notice about their schedules, limit last-minute schedule changes, compensate employees who lose income as a result of last-minute schedule changes, and in some cases offer more hours to part-time employees before hiring additional employees to perform similar duties. In general, how do you feel about such a policy?

It has been proposed that part-time workers that have worked three or more months at companies with 50 or more employees be given a legal right to request full-time work, and that companies would have to accept such a request if it did not create an undue burden for the company. In general, how do you feel about such a proposal?
